

A. Enhanced Definition Lens Tube 36°

1. The product shall be an optional fixed focus lens tube with a field angle of 36° for use with a ETC Source Four fixture body. When used as a template- or gobo projector, the product shall provide enhanced image acuity, heightened contrast and minimum distortion when compared to any other fixed focus profile spotlight.
2. The product shall result in no loss of field lumens when compared to standard fixed focus profile spotlights.
3. The product shall be retrofit-able into any new or existing Source Four fixture body. The product shall be available as an accessory and not require the purchase of an entire fixture.
4. The product shall be labeled in such a way as to easily distinguish it from standard lens tubes. The product shall not be labeled or marked in such a way as to be garish or distracting when placed in a system with other fixtures.
5. The product shall be available in standard black with silver grey, white and custom colours as options.
