REPORT NO. L6458

CLAUSE CLAUSE TITLE AND RESULTS

Samples of plastic from the luminaire were subjected to the glow-wire test at 850°C in accordance with the requirements of BS EN 60598-1 : 2000 Inc Amd 1 & 2 Annex ZC.

EVALUATION OF TEST RESULTS

When subjected to the glow-wire test at 850°C, the sample ignited and flames occurred. These flames extinguished within 2 seconds after removal of the glow-wire. No drop occurred to the paper tissue situated beneath the test sample.

The requirement of the Standard is that flames should extinguish within 5 seconds of removal of the glow-wire and that there is no ignition of a layer of tissue paper placed 200mm below the glow-wire.

The sample is therefore deemed to comply with the requirements for the 850°C glow-wire test.

NO OTHER TESTS WERE PERFORMED ON THIS SAMPLE.
