FLIGHT CASE FOR 4 MARTIN MAC AURA XIP SIP MOVING HEADS

This flight case meets the high standards of live event professionals and technical service providers by combining durability, functionality, and practicality in the field.

Constructed from 9mm brown phenolic-faced birch plywood, it offers excellent resistance to impact and wear. Its trunk-style design with a hinged lid ensures quick and convenient access to the equipment. Recessed padlocking butterfly latches provide secure closure with a smooth guided opening and closing mechanism. Rear-mounted lid stays add stability when open.

The case is equipped with recessed spring-loaded handles with double return springs for easy handling. Recessed stacking dishes allow for safe and efficient stacking. Branding is enhanced by MAC Aura XIP logo engraving on two sides.

The interior is designed to accommodate two foam inserts (not included) precisely cut to the shape of the moving heads, ensuring optimal support and stability during transport. A central wooden compartment is provided for storing cables, rigging hooks, or other essential accessories.

This flight case is a reliable and durable transport solution, perfectly suited to the logistical demands of technical crews and touring professionals.
