PRODUCT DESCRIPTION

Constantly checking documents and keeping your eyes trained on the nitty-gritty details? If that sounds familiar, the P4R pen light is just for you. It attaches to your shirt pocket via clip and can be focused from a flood for close-up illumination to a spot for a bigger range. You can operate it with both rechargeable and disposable batteries. And: The compact and high-quality housing is made of 75 % recycled aluminium.

- Rechargeable pen light with focus function (Advanced Focus System) and three brightness levels
- Dual Power Source: Operates with rechargeable and disposable batteries, charging via USB-C on battery (charging cable not included)
- Intuitive operation via End Cap Switch
- Sustainable: Use of 75 % recycled aluminium⁹ and 7-year warranty*
- Handy clip for attaching the pen light to your shirt pocket

PRODUCT SERIES

Powerful flashlights for those who push boundaries—the discerning enthusiasts, the industrious workers, the bold adventurers and the forward-thinkers. Lights that bridge the gap between the epic and the technical. In your hand, they do more than shine—they guide your path, reveal the unknown and empower you to explore, discover and redefine what is possible. Pioneering Brilliance. The P-Series: Redefined.

FOOTNOTES

The information pertaining to scope of delivery, appearance, performance, dimensions and weight corresponds to the information available at the time of publication. In the interest of product development, we reserve the right to change scope of delivery, appearance, design and color without prior notice. Product images may vary from the actual products and may show optional accessories which can be purchased separately. Errors and omissions excepted.

*) 7 year warranty only if registered, otherwise 2 years.
Warranty conditions viewable at <https://ledlenser.com/en/infos-service/warranty/>

1) Measured values according to ANSI/PLATO FL 1 in the respective setting named. If no setting is specifically named, the luminous flux (lumens/lm) and range (meters/m) values refer to the brightest setting and the burn time

(hours/h) values refer to the lowest setting. A boost function (if available) can be used several times, but is only available for a short time at a time. In case the lamp is equipped with colored LED(s), the measured values are given with white light or the white LED. If the lamp has different energy modes, the "energy saving mode" is the basis for the measurement.

2) Calculated value of the capacity in watt-hours (Wh). This applies to the battery(ies) contained in the delivery condition of the respective item or, in the case of lamps with rechargeable battery, to the battery(ies) contained herein in a fully charged condition.

9) All aluminium components are made of at least 75 % recycled aluminium and may thus vary in surface structure and color.
